

JIANGTU hydraulic grapple

Product Description

Jiangtu hydraulic grapple is a kind of excavator attachments which is used to handle large loads, making it ideal for site cleanup and material handling.

As one of the leading hydraulic grapple manufacturer in China, JIANGTU has a full range of grapples for excavator from 1.5-23 ton.They are suitable for all kinds of brands and models of excavators.

APPLICATION

- Scrap Handling
- Logging
- Job site clean up
- Sorting
- Structure Demolition

Application

The JIANGTU Hydraulic Grapple has a large jaw opening that allows it to pick up large materials, and the hydraulic design of the grapple give it better grip, so it can grab large and uneven loads, increasing productivity and efficiency in loading cycles.

excavator attachments

★★★★★

As an equipment operator and business owner I cannot believe the high build quality of these attachments. They are simply the most heavy duty highest quality with no cutting corners I have ever seen. This is the company I want to continue doing business with for all excavator and backhoe attachments. The quality really is first rate and the customer really is foremost. This was my first time working with both an overseas business and Alibaba. I could write a novel as to how well this transaction went and the quality of the products. I am still in shock and can hardly wait to do more business with this company and their products. I will be in future contact and am very very very satisfied. There sales representative Autumn made this transaction seamless and is a credit to the company. I will be looking forward to doing more business on various attachments for heavy equipment sales.

Respectfully Yours

Ben Williams
